

Application to use the Cambridge BioResource:

Please state the name, research interests and provide full contact details of the Principal investigator for the study.

Please state the name of the proposed research study.

Please provide details of the gene variant(s) of interest.

Please indicate the likely frequency of the gene variant(s) within a normal population.

Please detail the current state of knowledge regarding the functional significance of the variant and its likely associations with disease.

Please provide a summary and scientific justification of the proposed study including the numbers of individuals of each genotype required and the commitment required by each individual participant. Please include statistical support (including the name of the statistician) of how these numbers have been derived.

For studies requiring blood volumes of >50ml per volunteer please provide clear justification for the amounts requested.
